Summary:

Highly motivated Computer Science student with strong foundations in Machine Learning, Data Structures, and Backend Development. Passionate about building intelligent systems and solving real-world problems.

Skills:

Programming: Python, JavaScript

Technologies: Machine Learning, Deep Learning, NLP, Data Analysis

Libraries/Tools: Scikit-learn, TensorFlow, Pandas, NumPy

Web: React, Node.js, FastAPI

Projects:

ResiLens AI – Resume Screening System

Developed an AI-based system to classify resumes using TF-IDF and Logistic Regression. Integrated MongoDB for storage and built APIs using FastAPI.

Job Recommendation System

Built a machine learning model to match candidates with job descriptions using NLP techniques.

Experience:

Machine Learning Intern – XYZ Tech (3 months)

Worked on data preprocessing, feature engineering, and model training for classification tasks.

Education:

B.Tech in Computer Science (2022–2026)

XYZ University

Achievements:

Solved 300+ problems on LeetCode

Completed Coursera specialization in Machine Learning
